I am a over the road truck driver. I use xm instant traffic and weather. To avoid traffic problems. And to find out what weather is ahead of me way before I reach the city. and have to wait for a local station. This way I can plan my trip. XM radio is much better safety wise. I don't have to keep trying to find a station when I lose one, and take my focus away from the road and traffic. With XM I choose the station I want and I can listen to it all across the U.S.
